DreamStation

Pulse oximetry
reference guide

DreamStation pulse oximetry information

Setup of oximetry requires 3 components:

1. DreamStation Cellular Modem, US with oximetry;
DreamStation Wi-Fi Accessory, US with oximetry;
or a DreamStation Link Module

2. Nonin® Xpod SpO_2 assembly

3. Nonin oximetry sensors

Once components are connected:

· DreamStation will display the "good connection" icon ✔ if the
PAP oximetry sensor is connected to the patient, working, and
therapy is on

· DreamStation displays the "Good SpO_2" icon ✔ when the PAP is
turned off, after 4 or more hours of therapy and oximetry data
has been collected

Description	Part number
DreamStation Cellular Modem, US with oximetry	100600C
DreamStation Wi-Fi Accessory, US with oximetry	100700W
DreamStation Link Module	1120293
Nonin SpO_2 assembly	1121694
Reusable finger sensor (clip)	936
Oximetry finger sensor, adult flex	953
Flexiwrap, sensor tape, adult, 25/pk	954A
Reusable finger sensor (soft), medium	1062050
Reusable finger sensor (soft), small	1062051

*Note: DreamStation is only compatible with Nonin
pulse oximetry components*
